BRILLIANT SPA®

Make Your Jewelry Sparkle Like New

GEMORO
The Jewelry Cleaning Experts

INSTRUCTIONS FOR USE & SAFETY PRECAUTIONS

Congratulations on your purchase of the GemOro BrilliantSpa! The BrilliantSpa has been factory tested for performance as well as safety, and does an incredible job cleaning jewelry and more just like the professionals.

Please be aware that not all jewelry or other items may be cleaned by a steam cleaner. Always confirm if the jewelry or other item may be cleaned with steam prior to cleaning it with the BrilliantSpa.

INCLUDED PARTS

1. Stainless steel removable mesh basket.
2. Water fill funnel.
3. Water fill measuring cup.
4. Stainless steel jewelry holding tweezers (located in rear storage compartment).

SPECIFICATIONS

Power Voltage: 120V AC

Rated Frequency: 60Hz

Rated Power: 1000W

EASY TO USE QUICK REFERENCE GUIDE

DO NOT PLUG IN YET!

1. Place the BrilliantSpa on your counter positioned with its nozzle over the edge of your sink or counter.
2. Carefully unscrew the black fill cap, remove it and insert the funnel in the hole where the fill cap was located.
3. Fill the measuring cup with undiluted tap water to the indicated 5oz mark (two 5oz cups are required to reach the optimal steamer tank capacity) and slowly pour it in to the steamers funnel.

4. Replace the fill cap by hand tightening. Do not over-tighten.
5. Plug it in, then flip the power switch that is located on the power cord to the “I” position to turn it on.
6. The red LED indicator shows it is heating up the water in its tank and building up pressure. When the green LED lights up it is ready to be used.

TO USE THE STEAMER

- The steamer may be used as soon as it has built up sufficient pressure to light up the green LED indicator.
- Using the tweezers, hold jewelry approximately one inch beneath the steam nozzle. Be aware that the steam is **HOT**.
- Then press down on the black steam activation button on the top rear of the unit, behind the fill cap, to release the steam.
- It is recommended to use short, one or two second bursts to prolong maximum steam pressure.

WHEN IT BECOMES NECESSARY TO REFILL

- Turn the unit off by flipping the power switch located on the power cord to the “O” position.
- Unplug it from the power outlet.
- **Allow sufficient cooling time of approximately 30 minutes prior to refilling the tank. As a safety feature, the black fill cap can not be removed until it has sufficiently cooled.**
- While maintaining an arms length distance from the machine **slowly unscrew the black fill cap in the back**. As you are unscrewing the black fill cap the remaining pressure will release from around it. Press down on the steam activation button in the rear of the appliance to more quickly release the remaining steam in its tank. Remove the black fill cap.
- Lift the entire appliance by holding the handles on either side.
- Turn the appliance upside down over a sink to drain the steamer tank. To fully drain the steamer tank, while holding upside down, press the steam activation button.
- Follow the instructions 1-6 on the Quick Reference Guide above to refill the Brilliant Spa.

COMPLETE OPERATING INSTRUCTIONS – Steps 1 through 12 (WARNING: DO NOT PLUG IN OR TURN ON UNTIL YOU REACH STEP 5).

1. Place the Brilliant Spa upright on a flat, dry, level surface near the edge of a sink or counter.
2. Be certain the stainless steel mesh basket is installed into the slot located under the steam nozzle. Insert the basket firmly, while being sure to press hard enough to be certain it is installed securely and completely.
3. With the steamer being sufficiently cool, carefully unscrew the fill cap until it is removed, insert the funnel and while using the water fill cup, pour 5 oz. of undiluted tap water into the tank twice, making a total of 10 oz. Never guess at the water level as you might overfill the tank beyond 10 oz. capacity. Always use the supplied water fill cup.
4. Replace the water fill cap by hand tightening. Do not over-tighten. Over-tightening could result in damage to your fill cap gasket and consequently your steamer will not pressurize properly.
5. Plug in the Brilliant Spa to a grounded electrical outlet that has a power rating sufficient to operate the product. Locate the switch on the power cord and flip it to the “I” position to turn it on. Within approximately 3 minutes it will automatically heat up the water in its tank creating pressurized steam. The red LED light will indicate that the steamer is heating up the water in its tank and building pressure.
6. When the green LED lights up that indicates that it is ready to be used. Please note that the green LED light will cycle on and off as the steamers thermostat automatically heats up while maintaining constant pressure.
7. Using the stainless steel jewelry holding tweezers, firmly yet carefully grasp the item being cleaned and hold it approximately one inch beneath the steam nozzle located above the mesh basket or simply place the item being cleaned in the mesh basket. Please note that the mesh basket may be removed for an unrestricted cleaning zone when cleaning larger items.

8. Once the steamer has built up sufficient pressure and the green LED has lit up, press the steam activation button located on the top rear of the BrilliantSpa behind the black fill cap. The steamer works best when using short, one or two second bursts. Allowing a brief delay between bursts gives the steamer time to rebuild steam pressure. To clean an item on all sides, rotate the item under the nozzle. **Allow the jewelry time to cool before wearing.**
9. Inspect the item after cleaning and if it requires additional steam cleaning repeat these steps noted in #8. For dirtier items, additional steaming time may be required, pre-soaking in hot water will help or for faster results it is recommended to also first use the GemOro Sparkle Spa or Sparkle Spa Pro personal ultrasonic jewelry cleaner (sold separately) to loosen up the dirt and pre-clean prior to steaming.
10. When it is necessary to refill the Brilliant Spa, first turn it off and then unplug it from the power outlet. Press the steam activation button to release the remaining steam in its tank. Allow sufficient cooling time of approximately 30 minutes prior to refilling the tank with 10 oz. of water. When removing the fill cap after it has cooled, always unscrew it slowly while allowing the Brilliant Spa to gradually release any remaining pressure in the tank. To avoid over-filling the tank, it is recommended to grasp the Brilliant Spa with both hands while holding the built-in handles on either side. Turn it upside down over a sink to drain the tank.
11. When you are finished cleaning your jewelry, unplug the Brilliant Spa from the power outlet by grasping the end of the power cord closest to the outlet.
12. Prior to storing the Brilliant Spa after use, always release any remaining pressure in its tank by holding the steam activation button down. After allowing sufficient cooling time, remove the fill cap by unscrewing it slowly while allowing the tank to gradually release its pressure. Then lift the Brilliant Spa by its built-in handles and pour out the remaining water.

PRECAUTIONS & WARNINGS

1. The Brilliant Spa is specifically designed for cleaning jewelry. Although there are many other cleaning applications for the Brilliant Spa (such as for cleaning dentures, eye glasses, hand tools, small parts, etc.), caution and common sense should be used at all times as the Brilliant Spa could damage the item and/or the operator.
2. Use caution: the steam cleaner releases very hot steam under high pressure. **Never touch the steam nozzle or the area surrounding it, as you may get burnt.**
3. **Be certain that the black fill cap with its built-in safety release valve is screwed on by hand prior to use. Do not over-tighten. Never operate the Brilliant Spa steam cleaner without the fill cap properly installed.**
4. **The Brilliant Spa steam cleaner may only be used with undiluted tap water or distilled water. Never add any type of chemicals or cleaning agents to the water in the tank prior to steaming.**
5. The Brilliant Spa steam cleaner is designed to operate with a maximum of 10oz of water in its tank to produce a dry steam. **Do not overfill the steam cleaner tank. To do so will produce a potentially hazardous sputtering of water and wet steam.**
6. **Never plug in and attempt to operate the Brilliant Spa steamer without water in its tank.** If the Brilliant Spa runs out of steam during operation, turn it off and unplug it. Then allow approximately 30 minutes time to cool prior to refilling the tank to its 10oz water capacity (if water is still in the tank, while unplugged and cool, hold the Brilliant Spa upside down over a sink to drain the remaining water in its tank prior to adding 10oz of water). When removing the black fill cap after the Brilliant Spa has cooled, always unscrew it slowly while maintaining an arms length distance from it, allowing the steamer tank to very gradually release its pressure until fully released.
7. **Never attempt to unscrew the black fill cap and refill the Brilliant Spa steam cleaner tank while it is still hot and under pressure. There is a built-in safety feature that prevents the**

black fill cap from being removed while the steam cleaner is hot.

8. Lift or move the Brilliant Spa only by its built-in handles.
9. Always turn off and unplug the Brilliant Spa when not in use.
10. This appliance is not for space heating purposes.
11. **DO NOT IMMERSE IN WATER.**
12. **FOR INDOOR USE ONLY.**

WARNING: Danger of scalding!

Note: Recognized symbol for steam release located on steam activation button.

WARNING: To reduce the risk of electric shock, do not remove the appliance's cover. No user serviceable parts are inside. Only authorized service personnel should perform possible repairs of this appliance!

IMPORTANT - READ BEFORE CLEANING ANY TYPE OF JEWELRY

Prior to using the UltraSpa, always confirm if the jewelry in question may be cleaned with a steam cleaner. While some general guidelines are noted below for what may or may not be cleaned with a steam cleaner, the guidelines are not represented as being complete and are not meant to be used as your final determination as to whether or not the jewelry in question is suitable for being cleaned by the Brilliant Spa. **Before cleaning any piece of jewelry or gemstone, you should consult with a professional to correctly identify the item you desire to clean and confirm that it is suitable to be cleaned with a steam cleaner. GemOro disclaims, to the maximum extent permissible, (a) any responsibility for damage to jewelry or any other item, and (b) any responsibility for direct, special, incidental or consequential damages under any legal theory.**

For more information on jewelry care and cleaning, or assistance with finding qualified professionals with whom you may consult

regarding the potential cleaning of your jewelry, visit the following jewelry industry websites:

American Gem Society (AGS)

Guide to Fine Jewelry Care

<http://www.ags.org>

Gemological Institute of America (GIA)

<http://www.gia.edu/>

Jewelers of America (JA)

<http://www.jewelers.org/>

Always inspect the setting for loose stones prior to cleaning. Stones that are insecurely set may fall out when cleaned by a steam cleaner. Prior to cleaning, carefully touch the stone with a small probe (like a toothpick); the stone should not shift or wiggle. **If a stone falls out as a result of being cleaned with a steam cleaner, please be aware that the stone would have eventually fallen out anyway. Most consider it better to have a stone fall out in a reasonably controlled environment as opposed to at random while wearing it.**

The following types of jewelry should only be cleaned by a knowledgeable professional:

- Antique jewelry
- Enamel jewelry
- Paste jewelry (which is common with costume jewelry)
- Costume jewelry
- Jewelry containing stones that have been set with glue

MAINTENANCE

Your Brilliant Spa is designed to be a very low maintenance appliance. With moderate usage the tank (only when cool) that is located inside the steamer should be cleaned annually since water will leave a residue in the tank that can be flushed out. With the steamer unplugged, pour a small amount of any household cleaner into the tank that is designed to remove hard water deposits. Make certain that it is non-caustic, non-flammable and non-combustible and that it may be used on metal.

Then fill the tank with tap water, swish around and then allow it time to remain in the tank for a while. Then pour out the solution in the tank; flush the tank out thoroughly multiple times with tap water and resume normal use. The exterior of the Brilliant Spa may be cleaned by hand using a soft cloth and a mild household cleaner that may be used on plastic as well as stainless steel. Wipe dry using a soft cloth when finished.

WARRANTY

Congratulations on your purchase of the GemOro Brilliant Spa personal steam cleaner for jewelry! Your steamer features a TWO YEAR LIMITED WARRANTY from the date of its purchase by filling out the on-line WARRANTY REGISTRATION FORM at www.gemoroproducts.com/warrantyregistration. In the event the Brilliant Spa is no longer available or has been discontinued and warranty coverage is applicable, at the factory's sole discretion, an equivalent cleaner may be substituted in place of the defective Brilliant Spa. The purchaser shall incur the cost for return postage, insurance and handling for all warranty and non-warranty repairs. Warranty repairs and/or replacement(s) will be shipped back to the customer FOB Destination to the location of the customer's choosing if located within the Continental United States. Non-warranty repairs will be shipped back to the customer FOB Factory. Should the customer require the repair and/or replacement unit(s) to be shipped outside the Continental United States, the customer will be required to pay any related shipping charges and any related taxes/duties for the respective destination country.
